Installation Guide of Library Users Management System

Contents

Installation Guide

1. Install IIS server 7 upwards on any compatible system
2. Replace the default inetpub folder with the given inetpub folder
3. Setup Sql Server 2008 upwards
4. Create a file config.abc and place it in D drive

   the contents of the file should be as follows
      i. first line should contain Server name
      ii. second line should be "Library"(without quotes)
      iii. Third line should be the sql server username
      iv. Fourth line should be the sql server password
5. Create a empty file motd.txt and place in the D drive
6. Run the following SQL Quries in the SQL Sever
7. The default username and password are as follows
   o username – seniorlib
      password – seniorlib
   o username – entrance
      password – entrance
   o username – digilib
      password – digilib

```
CREATE DATABASE library

CREATE TABLE library.dbo.card(
        id char(16) NOT NULL PRIMARY KEY,
        name char(60) NOT NULL,
        designation char(32) NOT NULL,
        photo uniqueidentifier
        )

CREATE TABLE library.dbo.cardtemp (

                id char(16),

                name char(60),

                designation char(32),

        )

CREATE TABLE library.dbo.login (

                username char(32) NOT NULL PRIMARY KEY,

                pass char(32),

                designation int,

        )

CREATE TABLE library.dbo.today (

                tdate date,

                libin int,

                libvis int,

                digilin int,

                digivis int,

        )

CREATE DATABASE entrancerecord

CREATE TABLE entrancerecord.dbo.rangetemp (
```

```
            id char(16),

            name char(60),

            designation char(32),

            timein    datetime,

            timeout datetime,

            type char(7),

    )
```

CREATE DATABASE digilibrecord

CREATE TABLE digilibrecord.dbo.rangetemp(

```
            id char(16),

            name char(60),

            designation char(32),

            timein datetime,

            timeout datetime,

            type char(7),

    )
```

```
insert into library.dbo.login values('digilib','digilib',4)
insert into library.dbo.login values('entrance','entrance',3)
insert into library.dbo.login values('seniorlib','seniorlib',1)
```
